

ATMOSPHERES HOTELPARIS

We're looking forward to welcoming you at Atmosphères Hotel.
All our teams strive daily to ensure you enjoy a safe
and protected environment.

ROOM

We see your room as your own personal world and want you to feel at home here.
That is why we take so much care with it. The rooms are cleaned and disinfected to the strictest standards and are meticulously inspected by our Governors. Extra attention is paid to the fabrics and bedding. Contact surfaces are cleaned with a surface disinfectant with targeted action against viruses (EN14476).

RESTAURANT

Our restaurant enables you to comply with social distancing in all circumstances and our various outdoor areas are perfect for your enjoyment. Our menus have been adapted in collaboration with our suppliers to give even more preference to local producers. In accordance with government guidelines, you will be asked to wear your protective mask until the team has settled you at your table and if you are moving around the restaurant.

You can remove it as soon as you sit down. Our teams will be wearing protective masks to serve you.

WELLNESS

We wish to keep our wellness activities to a maximum. However, due to the pandemic, health authorities have ruled that certain activities must remain unavailable. As a result, the hammam will be closed until further notice from the authorities. There are still massages available. Our therapist will wear a mask during massages and we ask you to do the same. Our fitness centre and swimming pool remain accessible and we ask you to comply with protective measures. Due to the current health situation, there is regular and increased cleaning.

TAKE CARE OF YOURSELF AND OTHERS

We would ask you to stick to 4 basic rules
during your stay at the hotel.

Disinfect your hands
on arrival

Wear a mask in public
areas and restaurants

Wash your hands
regularly during
your stay

Maintain social
distancing at
all times
